

## How to use Messenger on a mobile phone:

### You will need:

- A device that is connected to the internet (Hint - If you're using a mobile device data charges may apply)
- To be able to open the app store/play store to download the app
- To be able to search the app store/play store
- A Facebook account

### Steps to use Messenger on a mobile phone:

- Open the app store/play store
- Search for and install Messenger
- After installing, select the app to open it
- Sign in using your Facebook details
- Select Allow notifications if you would like Messenger to let you know when someone sends you a message

### Next steps:

- Choose which friends and family on Facebook you want to chat with
